

Modernising the entrances to a gourmet restaurant

Our strenghts

- Modernisation of restaurant entrances
- Optimisation of customer and staff flows
- Improved user experience
- Improved thermal insulation

"Le Tablier Bariolé" wanted to modernise and automate access to its internal and external areas.

Born out of a strong desire to pass on to customers their devouring passion for French gastronomy and fine wines, the two founders of this well-known establishment in Grenoble have carefully devised a menu featuring fresh, seasonal produce to be enjoyed both at lunchtime and in the evening.

To improve the comfort and fluidity of movement within the restaurant, they are planning to install automatic doors. These will make it easier to move between the different areas on a daily basis: the kitchen, the reception room and the terrace, while preserving the harmony and uniqueness of the colourful decor.

A blend of efficiency and aesthetics reflecting their commitment to offering a unique experience to each of their customers.

Testimonial from Corinne, manager of Le Tablier Bariolé

I would like to express my complete satisfaction with the installation of our automatic doors by the Portalp installation team. The sales representative who worked with us on this project demonstrated his professionalism by listening to us throughout the process. The end result lives up to our expectations. I won't hesitate to recommend Portalp to my friends and family. Thank you again for your excellent service
