

KP evo

ADVANCED CONTROLLER

IF YOU WANT OR NEED MORE FIELD ADJUSTMENTS,
THE KP EVO IS THE ONLY WAY TO GET IT!

PLUG-IN HAND HELD DEVICE:

- Password (pin) protection capable.
- Full adjustability of opening & closing force.
- Adjustable hold-open time following an activation.
- Customizable assignment for all inputs – each numbered input can be assigned to any function.
- All inputs can be configured for normally open or normally closed logic.
- "Delay On Activation" up to 4 Seconds.
- Integral "Exit Only" function.
- Built-in cycle counter (cumulative and cycles since last reset).
- "Ratchet" (latching) activation function = activate to open, activate again to close.

- Door position switch for open and closed door – configurable logic.
- 7-Day programmable timer with memory and daylight savings time capability. (Requires CR 1216 Battery).
- Software updates via PCB-mounted flash drive connection.

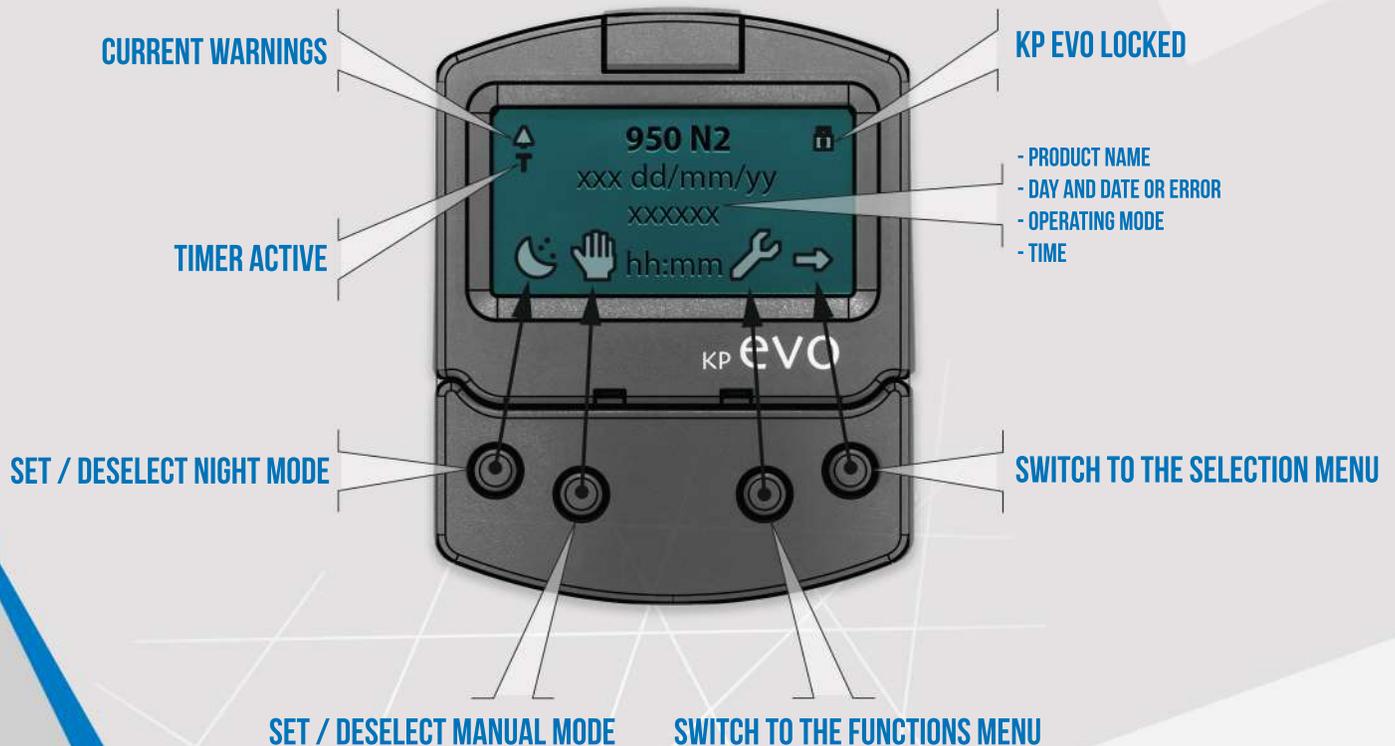

TROUBLESHOOTING AIDS:

- Real-time visible display for the status of inputs 10 through 17.
- Real-time visible display of encoder information.
- Real-time visible display of door position.
- Real-time visible display of PCB voltage & current.
