

VIGI'LENS PC

Video analytics solution for people counting

VIGI'LENS PC is a dedicated video solution to manage pedestrian Traffic in Open Establishments (TOE).

To respect social distancing & occupancy regulations, many facilities utilize people counting solutions to control heavy pedestrian traffic entering the Business.

The VIGI'LENS PC solution controls pedestrian traffic in real time, to allow facility staff to focus on their jobs.

People counting, at peak and off-peak hours

Local & remote displays

Warning when limit is reached

Access control devices (automatic doors, magnetic locks, electric strikes, keypads...)

PORTALP, AN EXPERT AT YOUR SERVICE

Established provider for automatic door installation, maintenance and video surveillance solutions

Maintenance and phone support services

Installation & maintenance service of electronics security systems (NF 367 - 180) Cybersecurity @

Intrusion detection categories AB - Certificate n°: 172/12/367-81 and CCTV - Certificate n°: 087/12/ 367-82

VIGILENS PC Video-analytics pedestrian counting solution

To measure and regulate retail store & restaurant traffic, using Hi Tech Artificial Intelligence (AI). The VIGILENS PC system responds to these challenges and manages the traffic flow in complete autonomy. (Un-manned)

1 COUNTING

Each entry and exit is analyzed, qualified and posted in real time by cameras installed near the door.

2 WARNING

When the traffic limits are reached (sanitary, security, fire, emergencies), VIGILENS PC can generate visual, audio, video or text messaging alerts.

3 INTERACTION

Will control automatic door(s) and any type of electro-mechanical lock. VIGILENS PC prevents unauthorized entrance; allows pedestrian exit.

Personalized programming access offers you a perfectly regulated solution

4 STATISTICS

The AI database can be collected for analysis (attendance comparison, turnover, etc.).

Benefits +

- Selective counting inputs/outputs
- Traffic display in real-time
- Detection reliability >99%
- Multi-entrance and location supervision on network
- Various installation configurations
- High-performance AI: gauges U-turns, one-ways, people and object distinctions, children/adults by size
- Commercially smart: detailed traffic reports
- Automatic door(s) management
- Time slot reports
- Allows your staff to remain focused on their duties (security, reception, checkout desk, etc.)

HIKCENTRAL platform multi-site management

HIKVISION

Camera specifications
