Creation of virtual keys for each user
Up to 32 users per door
4 user-configured functions
Faults reporting

Autodoor Pilot
For the end user to change the status of the door.
Automatic opening control
Locking / unlocking
Priority opening

Door Panels

- 2** Total weather seal when doors are closed to form a real air infiltration barrier.
- 3** Full vertical height interlock with double weather strip seal.
- 4** Safety beam sensors available.

B Naviblu, a wall mounted door control using one central browsing button for door status changes (**Optional**)

C 6-position key selector / 3.2" & 1.6" (**Optional**)

Detection Devices

D Hyperfrequency detection and active Infrared safety.

Hyper frequency radars ensure reliable performance and movement detection. The monitored infrared safeties detect any presence in the passageway or any obstacle hindering the panel closure.
